

Dashboard Testing Checklist

Project: E-Commerce Sales & Customer Analytics Dashboard

Tool: Power BI

Tester: Nazal Fabir

Testing Date: 7/9/2026

Version: 1.0

Testing Area	Test Case	Expected Result	Status
Data Validation	Verify Sales data is loaded correctly	All required sales records and columns are available	✓
	Verify Product data	All product records are loaded correctly	
	Verify Customer data	All customer records are loaded correctly	
	Check duplicate Order_ID values	Duplicate Order_IDs are handled correctly because one order may contain multiple products	
	Check missing/null values	Missing values are appropriately handled	
	Verify data types	Dates, numbers, text, and other fields have correct data types	
	Verify relationships	Customer, Product, and Date relationships work correctly	
KPI Testing	Total Sales	Matches the source data calculation	
	Total Orders	Counts unique Order_ID correctly	
	Total Quantity Sold	Matches the total quantity in the source data	
	Total Customers	Counts unique customers correctly	
	Average Order Value	Total Sales ÷ Total Orders	

KPI Testing	Total Discount	Matches total coupon discount	
	Cancellation Rate	Cancelled Orders ÷ Total Orders	
	Return Rate	Returned Orders ÷ Total Orders, if applicable	
	Average Delivery Days	Correct average of delivery duration	
	Sales Growth %	Growth calculation returns correct result	
Sales Overview Testing	Verify Sales KPI cards	All KPI values display correctly	
	Verify Monthly Sales Trend	Sales are displayed correctly by month	
	Verify Sales by Category	Categories show correct sales values	
	Verify Order Status chart	Order statuses display correct values	
	Verify Payment Mode chart	Payment modes show correct sales/orders	
	Verify Top States by Sales	States are ranked correctly	
Product & Category Testing	Verify Total Products	Correct number of products is displayed	
	Verify Top 10 Products	Products are correctly ranked by sales	
	Verify Sales by Category	Category sales values are correct	
	Verify Sales by Brand	Brand sales values are correct	
	Verify Quantity by Category	Quantity values are correct	
	Verify Product Rating	Product ratings are displayed correctly	
	Verify Product Performance Table	Product, category, brand, sales, quantity, and rating are correct	

Customer Testing	Verify Total Customers	Unique customers are counted correctly	
	Verify Customer Tier analysis	Sales/orders are correctly grouped by tier	
	Verify Top Customers	Highest-spending customers are correctly ranked	
	Verify Age Group analysis	Customers and sales are correctly grouped by age group	
	Verify Gender analysis	Sales/customer distribution is correct	
	Verify Customer Performance Table	Customer details and metrics are correct	
	Verify Customer Orders vs Spending	Customer-level points display correctly	
Geographical Testing	Verify Sales by State	State-wise sales are correct	
	Verify Top Cities	Cities are correctly ranked by sales	
	Verify Orders by State	State-wise order counts are correct	
	Verify Sales by City	City-level sales are correct	
	Verify Quantity by State	State-wise quantity is correct	
	Verify State → City drill-down	Selecting a state correctly shows its cities	
Order & Delivery Testing	Verify Orders by Status	Correct order-status distribution is displayed	
	Verify Payment Mode analysis	Payment modes show correct values	
	Verify Average Delivery Days	Delivery duration is calculated correctly	

Order & Delivery Testing	Verify Cancellation Rate	Cancellation rate is calculated correctly	
	Verify Return Rate	Return rate is calculated correctly, if applicable	
	Verify State → City Matrix	Order and delivery metrics are correct by location	
	Verify Cancellation Trend	Cancellation trend displays correctly over time	
Filter & Interactivity Testing	Test Date slicer	Relevant visuals update according to selected date	
	Test Category slicer	Relevant visuals update correctly	
	Test State slicer	State selection filters relevant visuals	
	Test Customer Tier slicer	Customer-related visuals update correctly	
	Test Order Status slicer	Order-related visuals update correctly	
	Test Payment Mode slicer	Payment-related visuals update correctly	
	Test cross-filtering	Selecting a visual filters related visuals correctly	
	Test drill-down	Year → Quarter → Month and State → City work correctly	
	Test page navigation	Navigation buttons open the correct dashboard page	
	Test Reset/Clear Filters	Filters are successfully cleared/reset	

UI & Performance Testing	Check visual alignment	All visuals are properly aligned	
	Check titles and labels	Titles and labels are clear and accurate	
	Check formatting	Numbers, percentages, dates, and currencies are formatted correctly	
	Check consistency	Fonts, spacing, KPI cards, and navigation are consistent	
	Check dashboard readability	Dashboard is easy to understand and use	
	Check dashboard performance	Pages and visuals respond within acceptable time	
	Check refresh	Dataset refresh completes successfully without errors	
Final Acceptance	Review all five dashboard pages	All pages function correctly	
	Verify all major KPIs	KPI values are accurate	
	Verify all slicers	Slicers work correctly	
	Verify navigation	All navigation works correctly	
	Final dashboard review	Dashboard meets the project requirements
